

Controllers Comments

It was a pleasure to work with Simon on this event. His local knowledge and energetic mapping have brought this area back into use for us. Honley is a definitive example of South Pennine/ EPOC woodland- you know what you're getting when you orienteer here. With two other adjacent woodland extensions and different starts and finishes, there are plenty of options for future events here. I thought Simon's courses showed a really good understanding of the physical and technical guidelines for each colour and provided plenty of variety. We worked together constructively and supportively.

Thanks to Neil, Jackie and their teams for seamless organisation.

The woods, of course, looked superb in the snow.
